Oct-Nov 99 DX Reports

The following reports of 50 MHz and higher DX propagation are courtesy of SM7AED's Six-metre Info, JA1VOK's column V, UHF DX Topics in MOBIL HAM, G4UPS, XE2HWB, VE7SKA, K6QXY, W5UWB, TG9AJR, ZL4AAA, LW5EJU, YO7VS, SP5XMU, and postings on the Internet. Apologies to any sources I may have inadvertently neglected.

The first entry is mmddhhii, where mm is the month, dd is the day of the month, hh is the hour UTC, and ii is the minutes after the hour. The year is understood to be 1999. A + to the right of the time indicates the observation was one of several in a time period and is probably later than the time reported. A ~ indicates approximate time. The grid square of the observing station may occur after a > symbol; however a time after > indicates the opening was still in progress at this time. A t indicates tentative identification of a TV station. Symbols just before the call of the reporting station include: V=Video Carrier, I=Inband video sidebands, F=FM audio, B=beacon, C=CW, R=RTTY, S=SSB, T=Television, W=mode not mentioned (or both CW & SSB), H=heard only.
